Agentic Opportunity Workshop

Identify the Right Agentic Use Case for Your Business in just 4 hours

DOOTRIX

Agentic Computing. App Modernisation. Cloud Integration.

Overview:

Your Roadmap to Agentic AI Success

In many organisations, hidden inefficiencies have become part of the operating norm - manual workarounds, duplicated effort, siloed systems, and decision-making bottlenecks. These friction points may once have been acceptable trade-offs, but with the advent of Agentic technologies, it's becoming increasingly clear they can be addressed in smarter, more scalable ways.

Agentic systems - goal-driven, context-aware, and autonomous are reshaping the future of work. But for most teams, the hardest part isn't buying into the hype - it's knowing where to start.

The **Agentic Opportunity Workshop** is a **free, half-day session** designed to help product and technology leaders validate early-stage Agentic ideas and translate them into focused, high-potential opportunities. Fast-moving, hands-on, and grounded in real business friction, this workshop sets you up to make confident decisions about where to invest.

Whether you're a CPO with a vision or a CIO evaluating feasibility, this workshop helps align ambition with action.

Who It's For

This workshop is designed for:

- Chief Product Officers
- Chief Information Officers
- Heads of Product, Engineering, or Architecture
- Innovation & Strategy Leaders

You'll benefit if you want to:

- Spot inefficiencies in time, cost, and process.
- Identify workflows that benefit from Agentic automation.
- Resolve those with systems that can act intelligently, autonomously and at scale

What You'll Get

You'll leave with the insight and assets to move forward - fast and with purpose.

- A shortlist of high-impact Agentic opportunities
- Clarity and alignment between product and technology stakeholders
- A Sprint Readiness Scorecard to assess feasibility and impact
- A tailored proposal for a 5-Day Agentic Design Sprint

How It Works

Duration
A 4-hour focused session

Format
A hands on, interactive workshop

Cost
Free, a strategic investment by Dootrix

Facilitators
Dootrix consultants using AI and UX tools

Workshop Agenda

Welcome & Framing

15 mins

Set shared goals and introduce the Agentic opportunity in plain, non-technical terms.

Problem Mapping

60 mins

Unpack real-world friction across your products, workflows, or operations.

- Surface pain points
- Map bottlenecks, manual tasks, and duplication
- Tag urgency using sentiment and effort markers

Agentic Ideation

45 mins

Align challenges with Agentic archetypes:

- Agent Assist
- Orchestrator
- Knowledge Manager
- Problem Solver

We will use techniques such as “How Might We” cards and case studies to spark ideas and co-create potential use cases.

Opportunity Scoring

90 mins

Evaluate ideas by:

- Business value
- Feasibility
- AI/Data readiness

Visualise with heat-maps to focus on the highest-leverage bets.

Sprint Readiness

30 mins

Summarise findings. Outline what a tailored 5-Day Agentic Sprint could deliver. Leave behind tools to socialise and secure buy-in.

Tailored to Your Team

We flex based on who’s in the room:

Product Leaders
Focus on business value, customer outcomes, and speed-to-market

Tech Leaders
Dive into integration, security, platform fit, and hybrid architecture

Why It’s Free

This isn’t a teaser. It’s a strategic investment we make in people who are serious about building intelligent systems that work.

The output is yours. If you’re ready to go further, we’ll be ready to lead the sprint.
